ScienceLogic

Hybrid Cloud Business Service Monitoring

Top Reasons Why ScienceLogic SL1 is the
Preferred Vendor for Future Proof IT Management

True Business Context Redefines Monitoring Strategy
SL1 helps businesses monitor what truly matters—the
health of a business service—rather than the status of a
bunch of devices. **Contextual business service monitoring,
provides an easy way to know if IT is delivering on its
promises to the business**, while also giving deep visibility
into the underlying infrastructure the business runs on.

Monitor Everything, Wherever it is
Designed for the future of Hybrid IT, ScienceLogic **supports
broad and deep visibility into a large range of AWS,
GCP, Azure and CSP services as well as traditional
infrastructure and private cloud for full cloud native, multi-
cloud and hybrid cloud monitoring.** With no 'dark corners'
for errors to hide, IT teams can quickly spot issues and
better map business service dependencies.

Future Proof Monitoring
Minimize the risk of monitoring gaps and easily support
business requests to support new technology with **SL1 no
/ low code builders create monitoring for practically any
asset.** Only SL1 is proven to monitor assets from satellites
to oil rigs to livestock.

Update IT Asset Status Instantly
**Ensure a consistent catalog of all IT assets and their
compliance** with CMDB synchronization. SL1 automatically
identifies and reconciles gaps in asset catalogs so you
always know the state of IT assets.

Reduce Ticket Volume and Noise
Prevent lost productivity that comes from having multiple
teams chasing dozens of alerts for a single incident. **SL1
event correlation reduces noise by 80%+ so your team
can focus on what matters most.**

Speed Incident Response
When incidents happen, stop wasting time gathering
diagnostic data from disparate tools; ScienceLogic
automatically consolidates the most important information
needed to start troubleshooting incidents. It also **automates
ITSM and notification workflows to create, populate and
route tickets, and notify** the right teams to jump-start
remediation efforts.

Accelerate and Automate Root Cause Analysis
ScienceLogic **automatically correlates events from your
monitored environment and analyzes logs with machine
learning to spot anomalies or changes that indicate likely
root cause when issues happen,** so you can solve them
faster and get business running again.

Enterprise Grade
ScienceLogic is a true, **enterprise-grade platform
that provides highly scalable, secure, multitenant,
deployments** on-prem or in SaaS, allowing you ultimate
flexibility based on your businesses' needs and data
security requirements.
